## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-6 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The present invention is to provide a computer power supply in which, by improving the circuit itself, internal heat loss can be reduced, thereby greatly improving efficiency. A primary side constitutes a partial resonance circuit 8 winding N1 of a high frequency transformer 3, a resonance condenser 7, and two switching elements Q1. Q2, a secondary side output circuit 4 for driving a load is connected to a secondary side of the high frequency transformer 3 via a winding, and a reverse converter 11 for driving and halting the first switching element and second switching element by causing the respective phases thereof to differ on the basis of a driving signal is provided. None of the cited overcomes the limitation of present application, since claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
